Islamabad, Pakistan (UTC+5) · Open to remote work

SUMMARY

Full-stack TypeScript engineer with nearly 5 years building Node.js, Next.js and Postgres systems, from multi-tenant enterprise backends to AI-powered products I designed and shipped myself. I own features end to end: data model, API, UI, tests, CI/CD and production monitoring.

EXPERIENCE

Full Stack Software Engineer · Genesis Engineering Jan 2024 – Present · Islamabad

- Build scalable multi-tenant Node.js backends with strict data isolation between tenants and efficient shared resources.
- Improved REST and GraphQL APIs through query optimization, caching and simpler database access — a 25% boost in system performance.
- Lead delivery in an Agile/Scrum team and own CI/CD pipelines on Azure DevOps, working with cross-functional teams to ship full-stack features.

MERN Stack Developer · TechChaps Technologies Dec 2022 – Dec 2023 · Islamabad

- Built and maintained Node.js REST APIs powering scalable web apps, and designed MongoDB, MySQL and PostgreSQL schemas with Mongoose, Sequelize and pg-promise.
- Added webhook integrations, caching and unit tests that reduced latency and improved reliability and code quality.

Junior Software Developer · Softosol Pvt. Ltd. Dec 2021 – Dec 2022 · Islamabad

- Built reusable React components that sped up internal app development and kept the UI consistent and easy to maintain.
- Developed Node.js REST APIs with proper error handling and documented them with Swagger and Postman.

SELECTED PRODUCTS

LifeLens — Next.js 16 hub, Expo mobile app and five lens apps on Supabase. 372 commits, 110 SQL migrations with row-level security, Vitest and Playwright tests, decisions recorded as ADRs.

Wardrobe Lens — Gemini Vision catalogs a garment from one photo; background removal runs in the browser (ONNX, MediaPipe). Circuit breakers and a graceful fallback when AI is unavailable.

@lifelens/auth — TypeScript SDK published on npm that gives separate Next.js apps one login through a PKCE bridge. 10 entry points, 15 test files.

OpenCode Chat — Copilot-style AI coding chat for VS Code: streaming responses, tool-permission prompts, model selection and a typed host–webview protocol.

GitSwitch — Tauri 2 / Rust desktop app for managing Git identities per folder. 25 Rust tests, CI, signed Windows installers with auto-update.

SKILLS

Languages & frameworks: TypeScript, JavaScript, Node.js, NestJS, Next.js, React, React Native / Expo, Vue / Nuxt, Rust (Tauri), C#

Data: PostgreSQL, Supabase, MongoDB, MySQL, Prisma, GraphQL

AI: Gemini / LLM APIs, AI coding agents, In-browser ML (ONNX, MediaPipe)

Delivery: Vercel, Azure DevOps, GitHub Actions, Docker, Playwright, Vitest, Sentry

EDUCATION & CERTIFICATES

BS in Software Engineering, International Islamic University, Islamabad (IIUI) — GPA 3.0 / 4.0

Docker — Certificate of Completion
